

Bi-metal thermometer with rear stem, galvanized casing and nickel-plated glass retainer; particularly suitable for under-floor heating systems.

**CASING:** galvanized aluminium. Standard diameter 40 mm; other diameters may be supplied on request.

**GLASS RETAINER:** nickel-plated steel.

**TRANSPARENT:** unbreakable methacrylate.

**DIAL:** printed with UV inks on pre-painted aluminium. Customer's logo or special graphics on request.

**STANDARD GRADUATIONS:** 0/120 0/80 0/60 °C. Other graduations on request, including graduations in °F or with double scale °C/°F.

**MECHANISM:** bi-metal precision spiral (class 2 according to UNI EN 13190).

**STEM:** turned and galvanized steel, standard diameter and length as per drawing. Different lengths may be supplied on request.
